Each line above represents one semester (75 hours) of work.

These are an example of the 22 or more credits necessary for admission to most four-year universities and colleges. Math credits should include: Algebra 1 or Integrated Math 1; Geometry or Integrated Math 2; and Algebra 2 or Integrated Math 3.

An additional 2-4 credits of core subject elective courses are strongly recommended.

Students who wish to attend a four-year university after high school should contact the institution(s) to which they are interested in applying, to determine their specific entrance requirements.
